French fries and potato slicing machines XA, Super XA, KF

French fries slicing machine KF with circular slicing block

Curcular blade blocks for XA, Super XA and KF

Typ Super XA, here installed on a french-fries sorting machine Typ 4M

Our slicing machines XA, Super XA and KF can cut both sticks with the dimensions 6 x 6 up to 14 x 14 mm and slices of different thickness.

It is the special advantage of the machines that it can make sure potatoes are slit lengthways. A very good cutting result, also facilitated by the rotating blades in the french fries slitting blocks.

The capacities range between 600 and 3000 kgs/hr according to the machine types.
